Built: 1966

Owner: Alliant Energy

Height: 39.5 feet

Length: 636 feet

Hazards (HazardDefs.html): drowning, urban, visibility

Warning Signs: need improvement

Portage: There are plenty of spots to take out upstream of the dam and walk down the road. There are also a plenty of areas to put back in downstream of it.

Comments: There appears to be a little breach designed in on the south side (river right), but never attempt to run it. It's way too small, and the paddler would get sucked right back into the recirculating water at the dam face.
